Axiomtek Announces Wide-voltage Range, Fanless 3.5" Intel® Atom™-based Embedded SBC- CAPA840.

Designed for applications such as IoT/M2M-related, industrial control, self-serve terminal, digital signage, POS and kiosk, the Axiomtek CAPA840 allows dual views through multiple display outputs of HDMI, LVDS and VGA. Additionally, the compact embedded SBC adopts a ZIO connector and has two PCI Express Mini Card slots for flexible custom configurations. It features wide voltage DC-in +12V to +24V to make power input more flexible.

IEI Introduces Promising Future for the IoT, IEI Set to Reap the Benefits.

IEI's (3022) general manager, Jordan Jiang, is confident of the IPC's competitive advantage in rapid IoT development. He believes that with customers becoming more receptive towards adopting smart network management solutions, and with the demand for IPC being driven upwards by the robust growth of the IoT industry, there is potential for IPC-related companies to double in value in two years.
