ARBOR

JULY 20, 2015

ARBOR Gladius 8, a Compact, Rugged Android Tablet for IoT and Professional Applications.

ARBOR calls Gladius 8 rugged IoT tablet because it can be both a mobile sensor device and an IoT gateway. The Gladius 8 employs an RFID/NFC reader, an industrial-grade 1D/2D imager, as well as a 12.6mp auto-focus documentation camera; the Gladius 8 can aggregate its polled and collected data, filter it, do desired local processing, and then pass it on to higher level gateways and networks either via Bluetooth, WiFi or mobile broadband.

IVS-100-BT

- Support 2.5" SATA 3Gb/s SSD | Built-in VGA output and HDMI output |

VEHICLE FLEET MANAGEMENT SYSTEM

IEI

JULY 27, 2015

IEI Launches the IVS-100-BT Vehicle Fleet Management System.

AXIOMTEK

JULY 28, 2015

Rugged 15" Full IP66 & IP69K Stainless Steel Panel Computer for Food Industry-Axiomtek GOT815-834.

Good food hygiene is essential to make or sell food that is safe to eat. Our brand-new GOT815-834 can be used in food and beverage production lines where daily cleaning with pressure water is required. Its fanless and noiseless design and IP66/IP69-rated waterproof enclosure keep the system working efficiently and reliability against hazards including dust, dirt, water, oil, and chemicals.

Intel® Core™ i7-4650U Railway Computer with EN 50155 Certification

NEXCOM

JULY 23, 2015

Robust Multipurpose Railway Computers Bolster Video Analytics and Passenger Infotainment.

The railway computers provide superb performance for not only running video analytics, but also supporting surveillance and instant playbacks in full HD. Crystal clear surveillance footage and video analytics combined deliver wide coverage in great detail and accuracy of detecting suspicious activities, thus improving overall security.
