## AAEON Enters the 4K Realm with EPIC-BDU7.

AAEON's innovative board layout for the EPIC form factor places the CPU on the solder side of the board, simplifying system mechanical design for optimized thermal solutions. Adding to the already extensive I/O features such as USB, COM, SATA, and PCIe sockets, the EPIC-BDU7 also offers a PCI-104 Slot, allowing multiple peripheral cards to be stacked on top of the main board.

## IEI's State-of-the-art Bay Trail Embedded Board Series Provide You a Never Before Experience!

This embedded board series provides high performance and low power consumption and can be used widely in vertical markets and all industrial environments. It is definitely the best replacement for the N270+945GSE embedded board series which will be gradually phased out in these 2 years.

AUGUST 27, 2015

## Accelerate Your Network Security Business with Axiomtek's Fanless Desktop RISC Network Appliance Platform- NA150.

To enhanced reliability, the newest SOHO network appliance NA150 supports Marvell® Armada 370 processor which provides new levels of performance.

AUGUST 18, 2015

## NEXCOM Creates Cloud Plant Factories with Windows® 10 IoT.

AUGUST 18, 2015

## ADLINK Debuts Intelligent IoT Gateway Starter Kit Based on Intel® IoT Gateway.

ADLINK's IoT Gateway Starter Kit simplifies device-cloud connection, accelerates IoT application development, and speeds deployment for a wide variety of application environments, such as industrial automation, smart buildings, smart parking systems, and agriculture.
