

PERFECTRON

SEPTEMBER 01, 2015

PERFECTRON launches new EPIC SBC OXY5638A.

Follows the EPIC standard, OXY5638A equipped with one PCIe/104 connector, which can easily expand extra interface module in the consideration of highest resistance of shock and vibration.

The rich-featured board that can be applied to cater various I/O requirements, which deliver excellent computing performance at minimal power consumption as well as advanced visual processing performance and can provide perfect solutions for industrial automation, transportation, energy, defense and high-end digital signage applications.

ACQU

SEPTEMBER 30, 2015

ACQU GROUP EUROPE BUSINESS TRIP.

ACQU Group will go to Slovakia, Hungary, Romania and Bulgaria from November 2nd to 15th. The delegation is to build close business partnerships between ACQU and these countries.

ACQU will bring the latest products' information as well as the most innovative samples with them, including motherboard products, embedded system, hardware, etc. Please accept our warmest invitation. Hope to see you soon.

AAEON®

an ASUS assoc. co.

SEPTEMBER 25, 2015

Optimize Vehicular Applications with AAEON's Latest GENE-BT06 3.5" Subcompact Board.

NEXCOM

SEPTEMBER 17, 2015

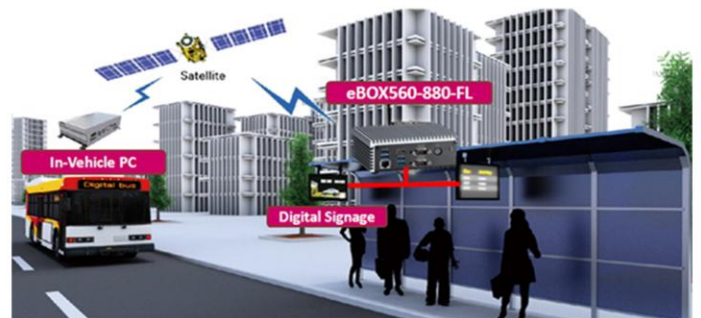

Open EtherCAT Robot Package Grants Freedom to Self-developed Applications.

NEXCOM's open EtherCAT robot package aims to grant robotics lab students and engineers freedom to develop and utilize their own control algorithm into best practice.

Such open platform enables coverage of robot kinematics and help cope with integration projects including machine automation, factory automation, and robot controls.

Outdoor Bus Information System

AXIOMTEK

SEPTEMBER 15, 2015

Ultra-compact and High-performance Fanless Embedded System – Axiomtek eBOX560-880-FL.

eBOX560-880-FL, a palm-sized fanless embedded box system utilizing onboard multi-core 5th generation Intel® Broadwell ULT SoC for both excellent performance and ultra-low power consumption.
