AAEON Expands BT Boards to Qseven and SMARC Form Factors.

These are the company's latest solutions powered by the low-power consuming, yet versatile Intel® Atom™/Celeron® E3800 processors.

This, accompanied by their small sizes, makes them fitting for applications demanding compactness and mobility, such as robotic arms and portable testing equipment.

NDiS B115 ▶

Open source Android™ platform
HDMI 2.0 compliant, support 4K2K video content at 60fps
