Advantech Newly Designed Modular Systems - ARK-2230 for Quick Equipment Integration.

The ARK-2230 supports Advantech's unique iDoor modules and ARK-Plus modules which is suitable for customers who require customized systems for equipment integration. Customers who need to integrate different equipment may find that standard product offerings leave a lot to be desired.

And if they choose to customize one of the standard offerings, they soon run into time-consuming sample processes and budget issues, not to mention hardware and software integration, re-verification, and re-certification.
