SI-313 Digital Signage Player for 3x 4K Digital Menu Boards and Signage Boards.

Featuring triple HDMI 2.0 with hardware EDID emulation, the SI-313 digital signage system is specifically designed to distribute digital menu boards and signage boards for delivering specific and dynamic messaging to convey brand information and highly targeted promotions to a large audience in airports, shopping malls, banks and restaurants.

With built-in hardware EDID emulation, SI-313 can prevent issues of lost displays and protect against hot plug events that reconfigure the display.
