ARBOR
JUN 26, 2017

MOBIL-INN Chooses ARBOR IOT-800 to Equip Brittany Garbage Trucks with iSmartCollect Solution.

In French Brittany, from Emerald Coast to Pink Granite Coast, we preserve our landscape and boroughs carefully.

Many of these boroughs are gradually investing in the best computing technology to optimize various services such as household waste collection.

Already established in the region, Mobil-Inn is equipping an increasing number of garbage trucks with their iSmartCollect solution. To embed it in-vehicle, the software developer has chosen ARBOR's IOT-800 Android terminal. -read more-

APLEX Technology
JUN 20, 2017

APLEX's Embedded solutions—TiTAN series is all in readiness for smart factory.

With the advent of industry 4.0, it critically changes the future of the factory in order to integrate value chain and supply chain.

The major challenge of this revolution is intelligent manufacturing for solving the issue of the workforce reduction, material costs rise, short product and service life cycle. Therefore, APLEX's TiTAN series combines with IIoT and real time computing, perfectly stabilizing the connectivity of H2M/HMI/SCADA system, optimizing the use of IIoT.

COMMELL
JUN 23, 2017

COMMELL expands Apollo-Lake processors to Mini-ITX platform LV-67U.

The LV-67U is based with Intel® Pentium® Quad-core N4200 or Celeron® Dual-core M3350 (which TDP just 6W), These embedded miniboards support DDR3L memory up to 8GB, These platforms are based on Intel®`s Gen 9 Graphics, which supports for 4k graphics resolution. -read more-

NEXCOM
JUN 27, 2017

NEXCOM EtherCAT General Motion Control Solution Simplifies Robotic Production Line Coordination.

NEXCOM's EtherCAT General Motion Control (GMC) Solution, NET 200-GMC, facilitates multi-axis coordination for robotic production lines.

Targeted at system integrators (SIs) for industrial automation, the NET 200-GMC Solution features high EtherCAT Master-Slave compatibility, SoftMotion support, and compliance with PLCopen motion control standards. -read more-
