The Latest Intel Core Processor-Based Embedded Platforms with 24/7 Operations Management for AIoT

Built with Intel's latest processors and Advantech WISE-PaaS/DeviceOn, an IoT device operations and management solution, these embedded platforms combine fantastic performance per watt, fast connectivity, as well as easy operations management—making them the ideal choice for visual computing, IoT, industrial, retail, healthcare, transportation applications, and more. - read more-

COM Express Modules with Wide-range Operating Temperature

Designed for the needs of IoT embedded applications including amusement gaming, ATM/POS, medical imaging, and industrial control, these highly scalable mini modules combine powerful graphics performance and energy-efficient computing power to effortlessly handle various tasks. The ET875 and ET870 have a wide-temperature operating range from -40°C to +85°C and long-term availability, while supporting two serial ports, four high-speed PCI-e Gen2 lanes and TPM 2.0 for data encryption management. -read more-

Neousys Technology Launched Nuvo-8208GC series

Neousys unleashed the world's first industrial-grade edge AI platform that supports dual top-tier 250W NVIDIA® graphics cards, the Nuvo-8208GC. Powered by an Intel® Xeon® E or 8th-Gen Core CPU, the system offers true wide temperature operation, up to 128GB of RAM utilization, 5 PCIe slots (dual 8-lane x16 slots), USB3.1 Gen 2/1 ports and is United States Military Standard (MIL-STD-810G, Method 514.6) certified to withstand vibration for in-vehicle usage. -read more-
