### Mini-ITX AIMB-228 with Quad 4K Displays support, AMD® Ryzen™ Embedded V1000/R1000 (SoC)

Advantech announces the release of AIMB-228, a new industrial-grade Mini-ITX motherboard based on the latest 14nm AMD® Embedded V/R-series System-on-Chip (12~54W TDP) with up to 4 cores/8 threads, and up to 11 Compute units to offer up to 3X more GPU performance. AIMB-228 can power up to four independent displays with up to 4K resolution, offering high computing and great graphic performance at low power consumption.

### Rugged, Advanced Pico-ITX Board with Intel® Atom® x5-E3940 Processor for Extreme Environments –PICO319

The PICO319 is a low power yet powerful fanless Pico-ITX SBC powered by the onboard Intel® Atom® x5-E3940 quad-core processor (code name: Apollo Lake). The noise-free pico-ITX motherboard offers combinations of ruggedness, high computing capabilities and enhanced graphics capability in an extremely compact size of only 100 x 72 mm. Moreover, the board features 12V DC power supply input with AT Auto Power On function. It brings a solid and standardized platform for industrial automation, transportation and retail applications.
