Axiomtek Launches Ultra-compact Fanless Embedded System – UST100-504-FL

Axiomtek unveils UST100-504-FL, an extremely compact fanless embedded system for in-vehicle edge computing and video analytics applications. This ruggedized in-vehicle system is certified with CE and FCC and is in compliance with ISO 7637-2. Axiomtek's UST100-504-FL features a single-sided I/O design for space-limited vehicle applications. The high-performance vehicle PC is powered by the LGA1151 socket 7th/6th generation Intel® Core™ or Pentium® processor with up to 35W TDP and comes with the Intel® H110 chipset.
