Advantech Releases Ready-to-Use Wi-Fi 5/BT 5.0 and LTE Cat.16 Wireless Kits for Enhanced Connectivity

Advantech is pleased to announce two wireless solutions aimed at improving connectivity in diverse applications. EWM-W192 K1 & K2 and EWM-C186K1 (EWM-W/C) wireless solutions enable Wi-Fi 5/Bluetooth 5.0 and LTE CAT16 respectively. EWM-W192 K1 & K2 are compatible with standard M.2 2230 A-E key form factor connectors, while EWM-C186 K1 connects easily to M.2 3042 key-B for convenient wireless access. Both EWM-W/C models feature FCC and CE-RED certified wireless antennas and cables for system designers seeking wireless solutions in diverse industrial, retail, and medical applications.

ADLINK Launches ROS 2 Robotics Controller Powered by NVIDIA Jetson Platform for Edge AI Applications

ADLINK has launched the ROScube-X Series, a real-time ROS 2 robot controller for advanced robotics applications. ADLINK's ROScube-X Series is powered by the NVIDIA® Jetson™ AGX Xavier module, which features an integrated NVIDIA Volta GPU, dual deep learning accelerators, and a wide variety of interfaces, including GMSL2 camera connectors for advanced robotics system integration. In addition, the DSP501-527 supports dual 4K displays with its DisplayPort++ and HDMI 2.0 ports to cope with the growing demand for context-aware digital signage. Featuring fanless operation and compact-size, this digital signage player is well-suited for digital menu boards, digital directory boards, self-service kiosks, video walls, and more.
