

2016.06

ACQU Group will be off duty due to the Dragon Boat Festival during June 09-12. 端午节

## ADVANTECH

MAY 11, 2016

### Advantech Launches Intel® IoT Gateway Technology-based Platforms.

These gateways provide a foundation for connecting devices seamlessly and securely, delivering trusted data to the cloud, and adding value through analytics.

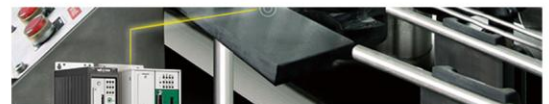

They enable machine-to-machine (M2M) communication, Integrated Services Router (ISR), and cellular connectivity for areas such as: industry, smart buildings, retail and transportation.

MAY 24, 2016

### AEON Rolls Out Vehicle-Specific Embedded PC Duo.

Built as in-vehicle network video recorders, both devices can essentially double up as fully fledged embedded PCs due to their versatility. First of all, the pair maintains the E13 certification for intended deployment in motor vehicles. Power Ignition Control is also incorporated as a form of protection against the power condition of vehicles, activating/ deactivating the device only after a preset time when the power supply is stable.

NET101-ECM/NET200-ECM  
Front-access Compact EtherCAT Master

## NEXCOM

JUNE 01, 2016

### NEXCOM EtherCAT Master Controllers Bring Advanced Control to Industrial Machines.

Combining easy-to-integrate software and hardware designs, the NET controllers reduce development efforts for machine makers, hastening the rollout of next generation industrial machines which can coordinate with other industrial systems and connect to the cloud.

APRIL 20, 2016

### ADLINK Launches 3U Compact-PCI® Serial 4th/5th Generation Intel® Core™ Processor Blade with ECC memory.
