NISE 4300: The Next Level of Fanless Systems

In our quest to continually update computing solutions to reflect your needs, NEXCOM brings you the NISE 4300, our next generation of advanced Intel® Core-based fanless computers. With a variety of I/O ports to connect your peripherals, it's particularly suitable for factory automation and other indoor industrial uses. Its resistive touch and IP20 rating also ensure customizability as a panel PC, making the NISE 4300 an all-in-one package for everyday needs, even as an edge server and IoT gateway.
